PROFESSIONAL SUMMARY

BCA student with strong knowledge of Python, SQL, databases, and operating systems. Skilled in problem-solving, troubleshooting, data analysis, and developing practical solutions using technology. Experienced in building academic projects using Python, SQL, and Power BI, with a strong interest in learning new technologies. Passionate about applying technical skills, improving processes, and contributing effectively in a collaborative IT environment.

TECHNICAL SKILLS

Languages: Python, C++,java
Databases & SQL: MySQL, SQL (indexing, query optimization, schema design, normalization)
Data & BI Tools: Power BI, Microsoft Excel (pivot tables, VLOOKUP, data modeling, dashboards)
Developer Tools: GitHub, Git version control, VS Code, Linux Command Line

Technical Support: Windows 10/11, Linux Basics, Basic Networking, Troubleshooting, System Configuration

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks, REST APIs, File Handling

Soft Skills: Communication, Problem-Solving, Analytical Thinking, Customer Service Orientation, Team Collaboration, Interpersonal Skills, Adaptability, Time Management, Attention to Detail, Professional Ethics

ACADEMIC PROJECTS

Sales Data Analysis & Business Insights Dashboard (GitHub Repository)

Python • SQL • MySQL • Pandas • Matplotlib • Power BI • Excel

- Developed an end-to-end sales data analysis project using Python, SQL, and Power BI to extract actionable business insights.
- Cleaned, transformed, and analyzed sales data using Pandas and SQL to improve data quality and reporting accuracy.
- Designed interactive Power BI dashboards to visualize key metrics such as revenue trends, regional performance, and product sales.
- Utilized SQL queries for data extraction, aggregation, and performance analysis to support business decision-making.
- Created visual reports using Matplotlib and Power BI for effective presentation of analytical findings.

Movie Recommendation System (GitHub Repository)

Python · Pandas · NumPy · Machine Learning

- Developed a recommendation system that suggests movies based on user preferences and viewing history.
- Implemented content-based filtering techniques to generate personalized recommendations.
- Processed and analyzed movie datasets to identify similarity patterns.
- Evaluated recommendation quality using similarity metrics and user feedback.
- Improved user experience through personalized content suggestions.

EDUCATION

Bachelor of Computer Applications (BCA) *2024 – 2027*

Saveetha College of Liberal Arts and Sciences | CGPA: 7.69/10

Class XII – Higher Secondary (CBSE) *2024*

Shiksha Niketan | Score: 66%

CERTIFICATIONS & ACHIEVEMENTS

- Python Programming || C++ Programming || MySQL (Simplilearn, 2026)
- Maintained 5+ public repositories on GitHub showcasing Python, C++, and SQL projects; demonstrated professional coding practices with clean code, meaningful commit messages, and comprehensive documentation
- Presented complex technical concepts to diverse audiences including students, faculty, and peers; received positive feedback on clarity, structure, and ability to explain database design, OOP patterns, and system architecture

LANGUAGES

- English
- Hindi
